ABOUT ME

Professor Ousmane THIARE has spent most of his academic and professional career at [Gaston Berger University \(GBU\)](#) of Saint-Louis Senegal, an institution of excellence created in January 1990 and Senegal's second public university.

Ousmane THIARE joined GBU in October 1994 and obtained a Diploma of Advanced Studies (DEA) in Applied Mathematics in 2000, after a clear course of study.

In 2002, he decided to strengthen his knowledge outside Senegal, notably at the Polytechnic School of the François Rabelais University of Tours (Polytech'Tours), where he obtained a second DEA, this time in Computer Science. He finished his studies in France with a PhD. in Computer Science at the CY Cergy Paris University in 2007.

In parallel to this brilliant career, Ousmane THIARE was already teaching courses at the same university that so brilliantly trained him, GBU. He was first a full-time Computer science Assistant in 2002, a full-time Assistant Professor in 2008 and then an HDR Senior Lecturer in Computer science between 2010 and 2015. He continues this teaching experience in Nigeria at the African University of Science and Technology (AUST) in Abuja where he has been an Associate Professor since April 2014.

It is in July 2015, that he is consecrated Full Professor of Universities at GBU. In April 2021, Ousmane THIARE becomes a Full Professor of the Universities of Exceptional class !

In addition to this academic experience, Ousmane THIARE was Head of the Computer science department at the Faculty of Applied Sciences and Technology (UFR SAT) between 2007 and 2009, Coordinator of the Post-Graduate in Computer Science in 2011 and then in 2013, Director of the Ousmane Seck Computer Centre. The IT Computing centre has a teaching, research and training mission. It is also responsible for the implementation of the University's computerization program.

Appointed Expert Evaluator of the National Authority for Quality Assurance in Higher Education (ANAQ-Sup) since 2014, he was also a member of the Scientific and Pedagogical Council of the Doctoral School of Sciences and Technologies of GBU between 2014 and 2019.

Professor THIARE has also been the Director of the [African Centre of Excellence for Mathematics, Informatics and ICT \(ACE-MITIC\)](#) between 2017 and 2020. ACE-MITIC is an ambitious World Bank project with a budget of USD 8 million to change the dynamics of access to employment by training a quality workforce while connecting all actors, applicants and other service providers in the fields of Mathematics, Computer Science and Information and Communication Technologies (ICT). Areas in which Gaston Berger University and its Professor have proven expertise.

It is with this rich but comprehensive experience that Professor Ousmane THIARE was appointed, from May 2018 to March 2023, Rector of the University Gaston Berger of Saint Louis, President of the Academic Council of the University. As Rector President of the Academic Council of the University, he was the main responsible for the study programs within the University Gaston Berger. He exercised the function of leadership of the University and was responsible for the formulation and implementation of appropriate operational policies and decisions relating to the institution of higher education, and in accordance with the University's strategic plan. He has been responsible for the

implementation of innovative programs and the adoption of new cutting-edge technologies by the University in order to make it globally competitive. He is responsible for establishing and maintaining mutually beneficial relationships with educational and research institutions, governmental institutions, commercial enterprises, industrial, professional, social, civil society and cultural institutions on a regional and international scale. He has also been the chief authorizing officer of the university's budget.

In December 2021, Professor Ousmane THIARE was elected Full Member of the [National Academy of Sciences and Techniques of Senegal \(ANSTS\)](#) in the [Fundamental, Applied and Innovation Sciences \(FAIS\)](#) section.

From November 2019 to June 2022, Professor Ousmane THIARE led the team that worked on the Scholars Program of the Mastercard Foundation. This program resulted in a funding, over nine (09) years of an amount of USD 37,786,408 or 23.7 billion FCFA. The Scholars Program at Gaston Berger University (GBU) aims to train 1,000 Scholars, 70% of whom will be women, at the undergraduate level in the fields of digital, agriculture, health and engineering by 2030 and to facilitate their transition to dignified and fulfilling work so that they can serve their communities and contribute to Africa's development. At the end of the proposed program, Scholars will become committed leaders in their communities and participate in developing their countries and Africa.

In June 2022, Professor Ousmane THIARE was appointed Director General of the [National Cyber-infrastructure for Higher Education, Research and Innovation \(CINERI\)](#).

However, Ousmane THIARE remains active in research in his preferred fields, namely: distributed systems, distributed resource management, computing grids, cloud computing, mobile ad hoc networks, wireless sensor networks and the Internet of Things (IoT). His various works are published in numerous international journals and conferences that can be discovered by browsing his ⇒ [web page](#).

DOCTORAL STUDIES

Subject: Group mutual exclusion in Distributed systems

Abstract: Group mutual exclusion is an interesting generalization of the mutual exclusion problem. This problem was introduced by Joung, and some algorithms for the problem have been proposed by incorporating mutual exclusion algorithms. Group mutual exclusion occurs naturally in a situation where a resource can be shared by processes of the same group, but not by processes of different groups. It is also called the "congenial talking philosophers problem". An example of application interesting is a CD jukebox (documentation, films...) on Internet : several users wishing to reach same CD will be able to do it at the same time instead of awaiting the end of the request of the other users.

Effective solutions, written in the message passing model and based on the quorums on the one hand and the circulation of token on the other hand are presented in this thesis. We tackle also the

problem of the mutual exclusion of group on the ad hoc mobile networks and we have proposed an algorithm which is sensitive to link formation and link breaking and thus which is suitable for ad hoc mobile networks.

Keywords: Mutual exclusion, Group mutual exclusion, Quorum, Ad Hoc Networks.
